YOUR **EXPERT PARTNER** FOR **ASSET MANAGEMENT**

The most **efficient** and **secure solution** for **company** asset **management**

"Full control over your valuable assets"

CAPTURETECH HELPS YOU INCREASE SERVICE LEVELS AND DECREASE OPERATIONAL COSTS

Managing keys and assets can be quite a challenge for any organization and often involves both direct and indirect costs. This is true for keys and company assets in the security business, money transport, the healthcare sector, hotels, car dealerships, government agencies and more.

The management of company assets is all about the following challenges

Security
How do I monitor critical assets?

Efficiency
How do I organize the management of company resources to avoid loss and search time?

Liability
How do I avoid that loss?

How the CapLocker Works

Mapping
Mapping and organizing assets

Issuing and Collection
Controlled issuing and collection

Who, What, When?
Keep track of precisely who took what asset when

CAPLOCKER - MANAGE YOUR ASSETS MORE EFFICIENTLY

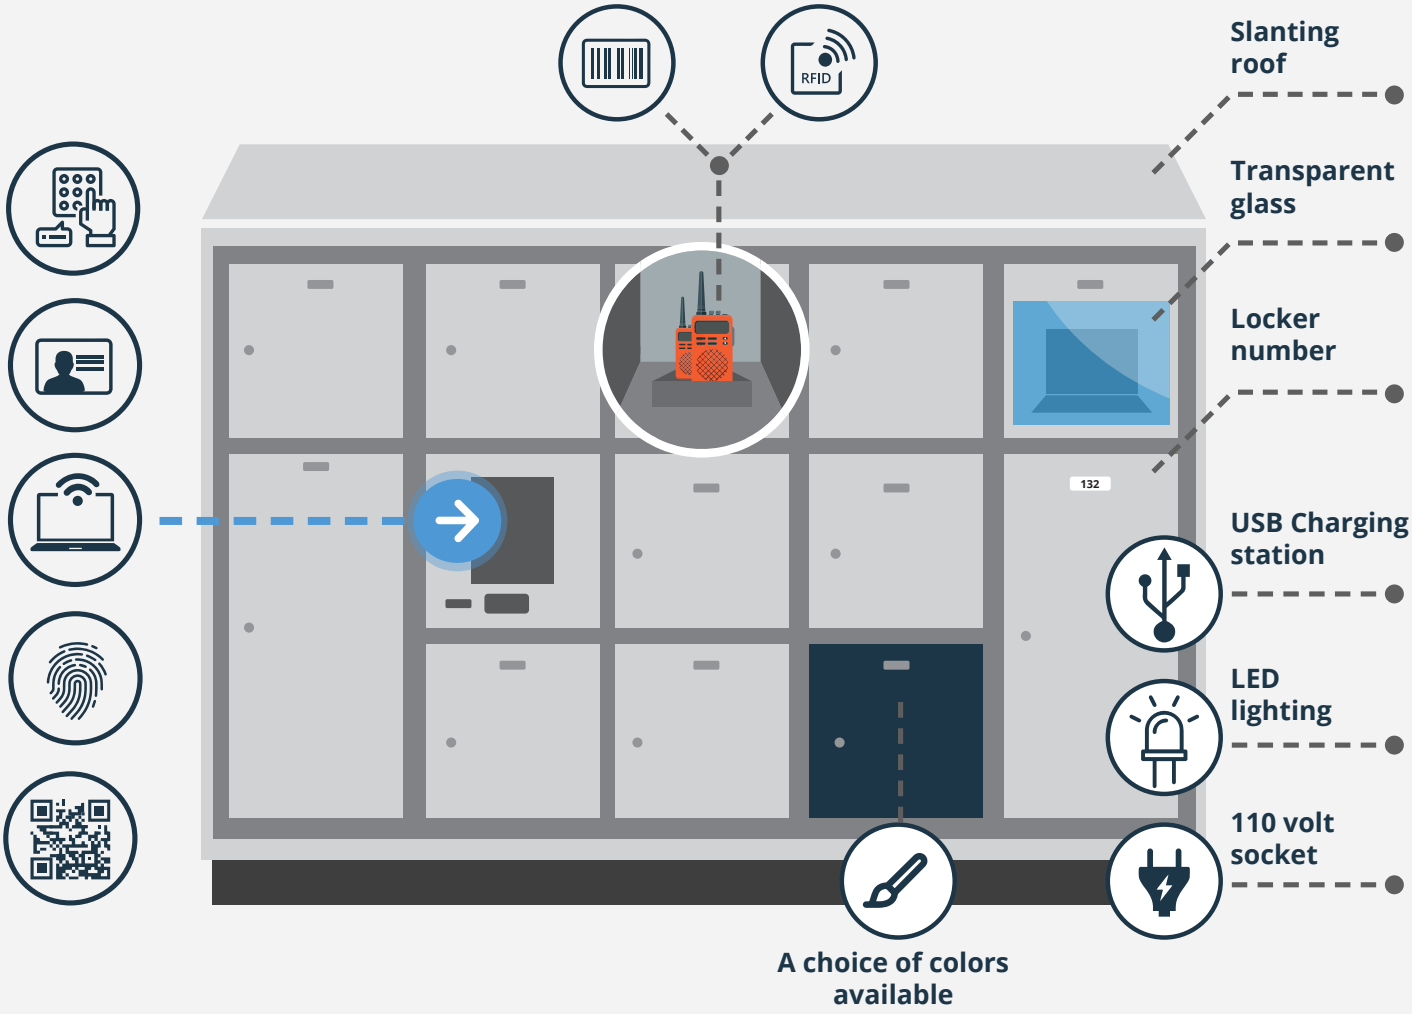
"Complete, simple and safe."

CaptureTech electronic lockers are an efficient way to manage your assets. The system offers full insight and makes everything easy to monitor. So, no more endless hours of paperwork and searching. The CapLocker: the electronic locker system developed specifically for efficient asset management. The system is available in various formats and includes software for a closed audit trail, implementation and maintenance.

Benefits at a Glance:

- Efficient management
- Easy tracking & monitoring
- People-independent transfer
- Less paperwork
- Enhanced security

MODULAR - OPTIONS



SOFTWARE - WATERTIGHT AUDIT TRAIL

Do you want to know exactly when which assets are transferred to whom? In other words, do you need a complete and comprehensive overview or full audit trail of your assets? The CaptureTech Webmanager bares all.

Benefits:

- Easy management of users and KeyCops
- Watertight and real-time audit trail
- Central management of multiple KeyConductors
- Alerts and swift reporting

CaptureCloud

The CaptureTech Webmanager for CaptureCloud can be hosted by CaptureTech so that you don't have to set up your own server. All you need is an internet connection.

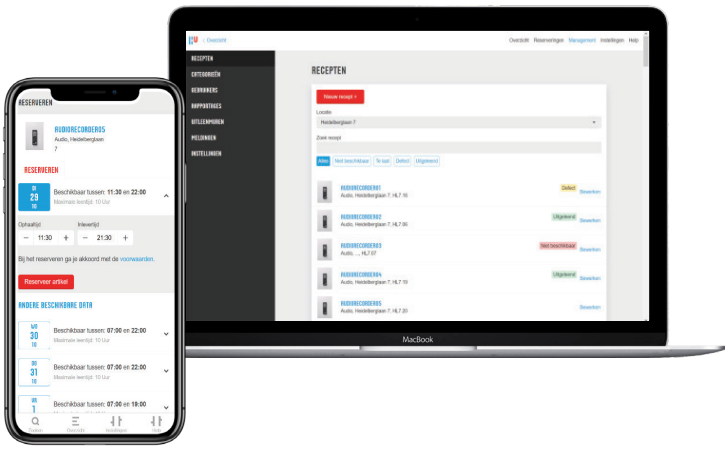
Benefits:

- No server or server management
- Accessible and available 24/7
- Optional simple service and support

RESERVATION MODULE - SIMPLE AND SECURE ONLINE RESERVATIONS

Booking in advance couldn't be easier. With the web-based reservation app, you can reserve the desired resources easily and securely and collect them using a QR code.

Administrators have a set of tools at their fingertips to make resource management simple and transparent. It's easy to create alerts, for instance, generate comprehensive reports and much, much more.

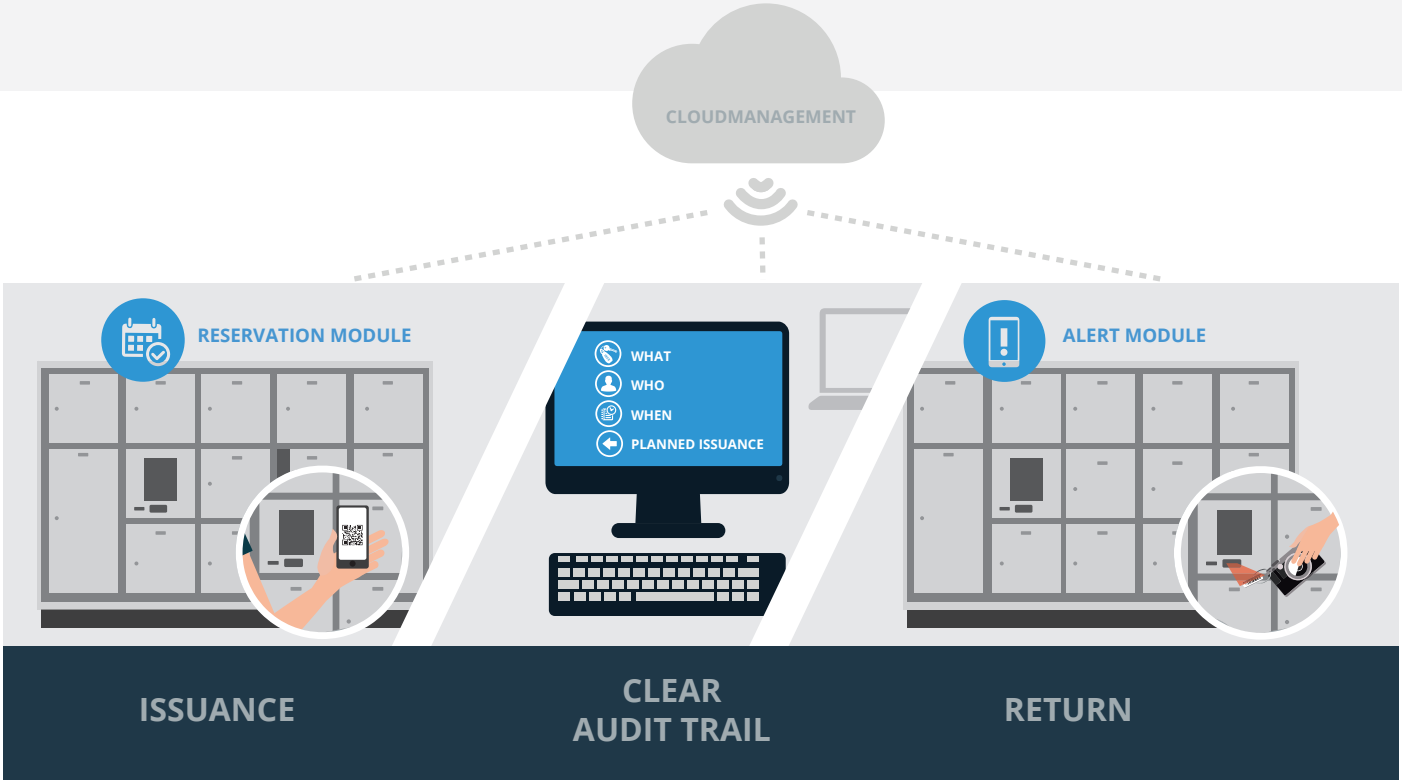


OTHER PLATFORMS - WORK FROM YOUR EXISTING APPLICATION

Being efficient, you want to work from existing applications and platforms. So you use existing data, such as users and resources. CaptureTech can be easily linked to different applications and platforms using an API.
The CaptureTech WebManager is then fed by an external system and connects seamlessly to the KeyConductor.

Benefits:

- Work from existing, familiar applications and platforms
- Automatic linking of users and resources
- Two-way traffic for issue and return



INSTALLATION, SERVICE AND SUPPORT

Being a total-solution provider, CaptureTech guarantees flawless operation. Installation is carried out by our own specialists; you enjoy 24/7 availability. CaptureTech has its own service and support organizations in the Benelux, UK and US.

COMBINE WITH KEY MANAGEMENT

In addition to the secure asset storage, you can also manage keys.

CaptureTech has a range of standard solutions for the electronic management of between 6 and 6,000 keys or keychains.

Pick-to-light functionality ensures simple, fool-proof operation: colored lights indicate the KeyCop to be taken and where it is to be replaced.

KEYCOPS - SECURE KEYCHAIN

The KeyCop is a sealed or reusable 'intelligent' keychain with barcode used for one or more keys. KeyCop makes it easy to maintain the overview of key-use management securely. It can be used in combination with the electronic key cabinet KeyConductor, or via the software hat enables personalized transfer.

Features:

- Robust, featuring durable barcode
- The latest Ultra High Frequency (UHF) RFID technology
- Safe and strong cable or metal bracket
- A choice of colors
- Optional personalization with logo or company name

Benefits:

- Increased security awareness and discipline
- Longevity and reliability in use
- The same or frequently changing keys
- For chains of between 1 and 15 keys
- Simple, swift returns

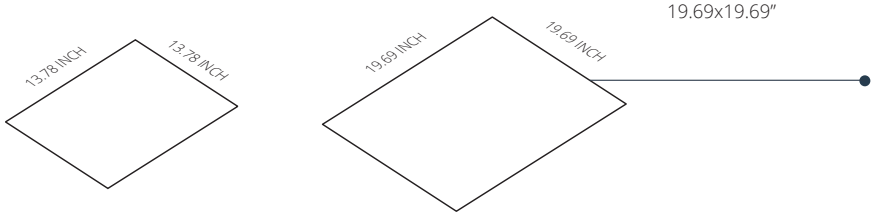
VARIOUS MODELS

HOW DOES IT WORK?

The KeyCop works with various technologies
The KeyCop's unique number is laser-engraved on the keychain as a barcode and as a sequence of digits. In theory, people could read this number during manual key issuing and collection. But the use of a barcode scanner increases speed considerably. And the identification number is also stored on the KeyCop's integrated RFID tag, so in all, a KeyCop can be identified in three different ways: by reading the number, scanning the barcode or electronically reading the RFID tag.

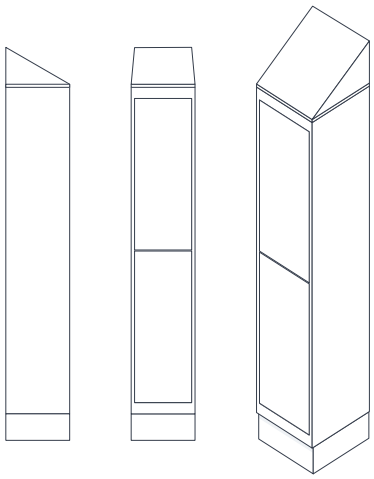
MODULAR - A CHOICE OF 20 MODULES AND DIMENSIONS

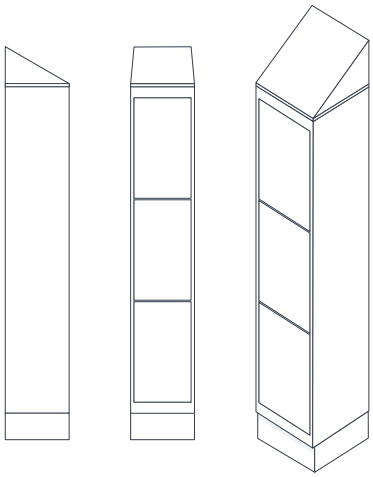
Four basic combinations:
13.78x19.69″
19.69x13.78″
13.78x13.78″
19.69x19.69″



MOD2

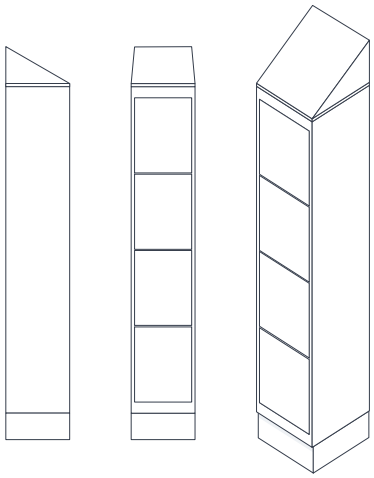
Basic size	19.69 x 13.78″
Inner dimensions compartment W x H:	6.42 x 12.8 x 33.58″
Volume compartment:	30.38 gallon
Weight:	90.39 lbs per box





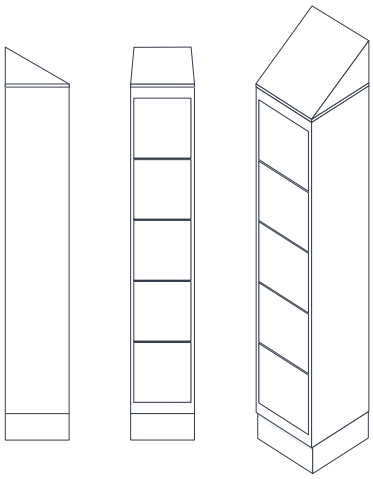
MOD3

Basic size	19.69 x 13.78″
Inner dimensions compartment W x H:	16.42 x 12.8 x 22″
Volume compartment:	19.81 gallon
Weight:	90.39 lbs per box



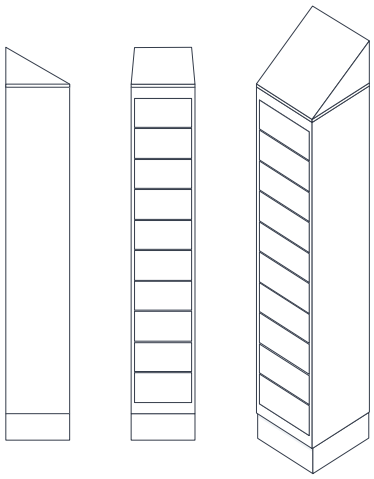
MOD4

Basic size	19.69 x 13.78″
Inner dimensions compartment W x H:	16.42 x 12.8 x 16.34″
Volume compartment:	14.79 gallon
Weight:	90.39 lbs per box



MOD5

Basic size	19.69 x 13.78″
Inner dimensions compartment W x H:	16.42 x 12.8 x 12.95″
Volume compartment:	11.62 gallon
Weight:	92.59 lbs per box



MOD10

Basic size	19.69 x 13.78″
Inner dimensions compartment W x H:	16.42 x 12.8 x 6.18″
Volume compartment:	5.55 gallon
Weight:	105.82 lbs per box
