

## VOICE DEVICES AND HEADSETS

# Honeywell Voice SR-35 Wired Headset

Honeywell Voice SR-35 Wired Headset

## Overview

Feedback

In the world of distribution, where logistic improvements are measured in seconds, team members can't afford to miss hearing a single assignment or be burdened with repeating responses, resulting in delays. When every second counts, Honeywell Voice™: speech recognition wired headsets provide the performance you need in the most demanding industrial environments.

- Honeywell speech recognition headsets are purpose-built for Honeywell Voice-enabled applications, offering wired options that support the unique needs of freezer environments, high-noise environments and hard hat workers.
- All Honeywell Voice wired headsets are tested with 15 drops from 2.1 m (7 ft) at minimum and maximum operating temperatures, and 50 drops from 1.8 m (6 ft).
- All Honeywell Voice speech recognition wired headsets have been optimized to work with Honeywell Voice A500 and A720 mobile devices, with models that are purpose-built to operate in specific environments.
- The Honeywell Voice SR-35 Wired Headset is a lightweight, behind-the-head configuration for workers with special head coverings, hairstyles or hats (including hard hats).
- In the challenging freezer/cold storage environment, the design of the Honeywell Voice wired headsets means they withstand extreme cold, and can be worn comfortably with protective clothing.
- Single earcup headset that provides noise reduction in industrial environments that require a hard hat.
- Works with hard hat styles that accept a PELTOR™: clip. (Hard hat and PELTOR clip not included.)

## Specifications

## FEATURES

---

### Features

- Built for Vocollect Voice-Enabled Applications
- Ideal Partners for Vocollect A500 and A720

## NETWORK

---

### Bluetooth Specifications

- N/A
